Subject: Re Boeing Thompson Shoreline Stabilization project next steps

Hi Rory,

Thanks for sending the information on the Boeing Thompson Shoreline Stabilization project. I have shared this information with Elly Hale (RPM - LDW) and based on our review, we have a number of questions and concerns that we would like to discuss with the applicant regarding the following topics:

1. The potential of the proposed work at the Thompson area to affect the Carbon Pilot project (currently underway).
2. The lack of sediment data in areas where non-isolating backfill is proposed (especially at the head of Slip 6).
3. The status of coordination with Ecology source control and cleanup given that the proposed work appears to be an Interim action under MTCA
4. The status of coordination/integration with upland properties undergoing RCRA studies and/or cleanups
5. The status of the application and compliance with the Shoreline Management Act

Given the breadth of aforementioned topics, we feel it is important to include Ecology (Source Control/MTCA and 401Cert reviewer cc'd on this message) in future discussions with the applicant. Would you be willing to organize a conference call or face-to-face meeting with the applicant and other parties to discuss our questions/concerns?

Thanks for your help on this. Feel free to give me a call for further discussion if needed.

Erika
